The digital edition of a highly reputed shipping news journal, 'Lloyd's List' recently published an exhaustive list of world's 'Top 10 shipmanagers 2023' (<https://www.lloydslist.com/LL1147388/Top-10-shipmanagers-2023>).

ANGLO-EASTERN, fronted by BJORN HOJGAARD, holds on to the TOP SHIPMANAGER crown for another year as ranked in this list published on December 1, 2023.

Lloyd's List writes that the majority of the elite group of shipmanagers have continued to advance fleet profiles over the past 12 months, as shipowners increasingly look to the sector's services and value proposition to run vessels on their behalf.

Ranking Bjorn Hojgaard, Anglo-Eastern to number one position in this prestigious list, 'Lloyd's List' states that: The mid-year arrival of capsized-plus liquefied natural gas dual-fuel bulk carriers 'Ubuntu Empathy' (IMO: 9957000) and 'Ubuntu Humanity' (IMO: 9957012) marked a new direction for Anglo-Eastern.

The newbuildings, which were delivered by Shanghai Waigaoqiao Shipbuilding under the supervision of Anglo-Eastern Technical Services, reduce the capsized carbon footprint by 35% while offering more carrying capacity.

The company, led by chief executive Bjorn Hojgaard, completed the acquisition of Cruise Management International at the beginning of 2023 and rebranded it as Anglo-Eastern Cruise Management. The CMI fleet, already under the partial crew management of Anglo-Eastern, comprises 12 expedition class vessels of various sizes and three cruise ships.
